PennDOT Schedules Repairs on Rt. 230, Main Street in Middletown *Curb, drainage, base repair work planned through winter; Paving scheduled for spring*

Harrisburg, PA – The Pennsylvania Department of Transportation (PennDOT) announced today that on Monday, November 2, its contractor will begin work as part of a project to repair and resurface a 3.2-mile section of Route 230 in southern Dauphin County from just west of the Airport Connector at the intersection of Harrisburg Pike and Tiago Avenue in Lower Swatara Township, continuing on Main Street through Middletown Borough to the intersection of Harrisburg Pike and Route 341, Colebrook Road in Londonderry Township.

Some sections of Route 230 average 15,900 vehicles traveled daily.

PennDOT advises travelers that they may encounter shifting traffic patterns or single-lane traffic restrictions with flaggers assisting them through the work zone on weekdays from 8:30 AM to 3:30 PM for curb, drainage and base repair work through the winter, then in the spring from 6 PM to 6 AM during nighttime paving operations. To avoid delays, travelers should allow for additional time in their plans or seek an alternate route.

The \$1,997,447.65 contract was awarded to Pennsy Supply, Inc., of Annville, Lebanon County, and includes curb cut work required by the Americans with Disabilities Act, drainage improvements, roadway base repair, removal of the top layer of asphalt, bituminous paving, guiderail replacement, sign installation and new pavement markings. Work under this construction contract is scheduled to be completed by the end of June 2016.

Motorists are reminded to be alert for these operations, to obey work zone signs, and to slow down when approaching and traveling through work zones, not only for their safety, but for the safety of the road crews.

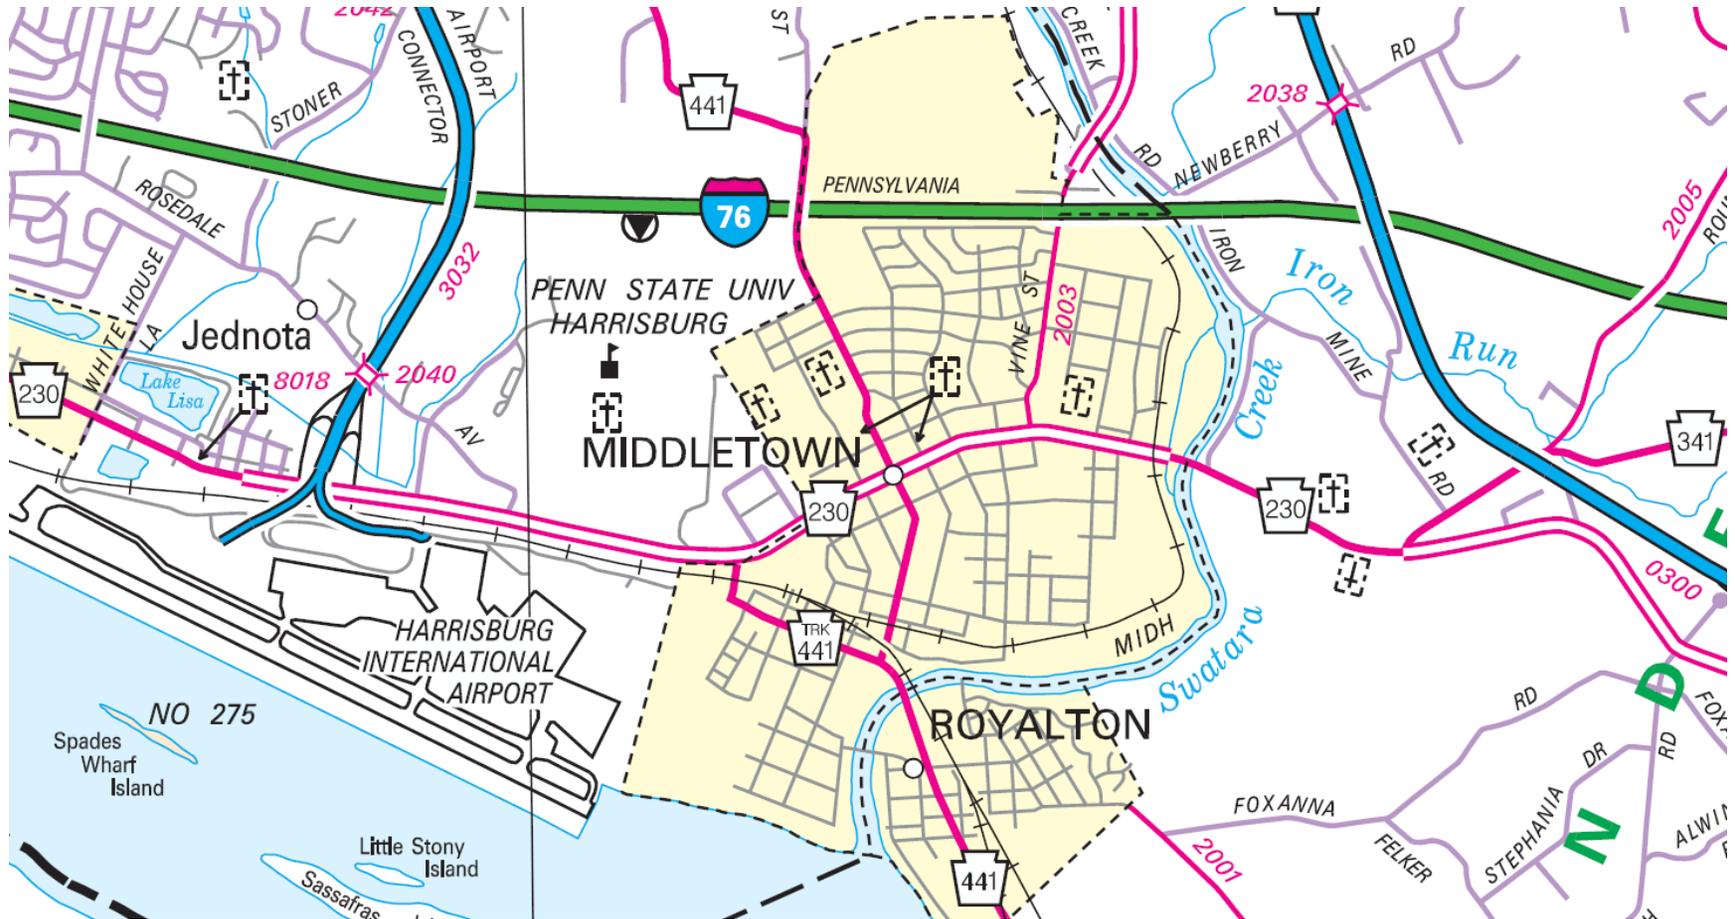

Motorists can check conditions on more than 40,000 roadway miles by visiting www.511PA.com. 511PA, which is free and available 24 hours a day, provides traffic delay warnings, weather forecasts, traffic speed information and access to more than 700 traffic cameras, 94 of which are in the Midstate.

511PA is also available through a smartphone application for iPhone and Android devices, by calling 5-1-1, or by following regional Twitter alerts accessible on the 511PA website.
