

# LAWN FERTILIZING CAN HARM OUR STREAMS

When it rains, excess lawn fertilizer is washed into storm drains and into our lakes and streams.

This causes pollution, which is unhealthy to people and fish.

So what should you do?

It's simple.

Please follow lawn fertilizer directions  
& use sparingly.

If you have questions regarding storm water, please contact the Dauphin County Conservation District at 717-921-8100, your local municipality or Pennsylvania Department of Environmental Protection's Regional Office at 717-705-4700.
