### Covid Precautions Recommended by the Pennsylvania Department of Health

➤ **Cover Your Mouth and Nose with a Mask**
Covering your nose and mouth with a facemask limits the distance that your germs are able to travel in the air when you breathe, cough, sneeze, and speak, helping to prevent infecting the people around you.

➤ **Regularly Wash Your Hands with Soap and Water, and Surfaces with Disinfectant**
Washing your hands and the surfaces around you can remove and kill germs, helping to prevent you and the people around you from being infected.

➤ **Practice Social Distancing**
Maintaining a physical distance of 6 feet or more from people who do not live in your home helps to reduce the likelihood of infecting each other.
