

MULCHING LEAVES ISN'T A **TRICK...**
IT'S A **TREAT** FOR YOUR LAWN!

**Fall leaves and other organic plant material
are storm water pollutants!**

Leaves and yard debris left in the street contributes nutrients to storm water runoff that causes serious water quality issues!

Mulch leaves with a lawn mower. Leaves provide nutrients for healthy soil, Mother Nature's fertilizer.

Keep storm drains clear of leaves. Make sure your lawn care service is properly disposing of all waste.

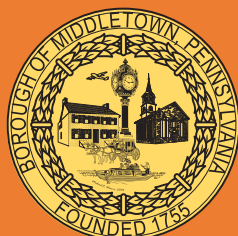

Middletown Borough provides **Fall Leaf Pick-Up** in the fall. Leaves may be placed along curb **only** the week of **Pick-Up**.

DON'T blow or place leaves and yard debris on the sidewalk, or storm drains!

DO compost your leaves or bring them to Woody Waste for recycling! Must purchase Woody Waste Facility cards at the Borough Office to access facility.
